

SiloFloat®

Anti-algae solution for silos

Anti-algae floating cover for water silos

The SiloFloat® meets the demand for a high-quality and worldwide applicable anti-algae solution for water silos.

The SiloFloat® covers the water surface nearly 100% and can be applied both in an empty and a filled silo.

Since the SiloFloat® can be installed without tools nor electricity by only two people, the SiloFloat® can be placed quick and easy all over the world.

The SiloFloat® anti-algae system is supplied as one complete system including all necessary components.

Benefits:

- Small transport volume
- Complete delivery including technical manual
- Very easy to install without tooling
- Quick installation in both empty and full water silos
- Suitable for all types of water storage in horticulture
- Coverage of at least 95% reduces algae growth
- Low maintenance
- Smooth material, less accretion of weeds
- Very high buoyancy
- High UV-resistance
- Reduced evaporation
- Repairable in case of damage
- Cleanable.
