

Genap Silo Ladders

Cost effective and robust ladder system

Genap introduces the Genap Tank Ladder system for water silos

The Genap Silo Ladder system is designed to be a cost effective and robust system to enable safe inspection of the silo contents. The ladder system is suitable for all silo heights upto and including 4.64 metres.

Supplied with brackets and fixings to fit a Genap Silo the Genap Ladder System is packed for home and export markets and can be self installed on a new silo.

A caged version is also available for heights 3.88 and 4.64 metres.
