

# Genap Level Indicator

Truly accurate, highly visible level indicator

## Genap introduces the truly accurate Level Indicator for water silos.

The Genap Level Indicator is suitable for silos upto 5.0 metres high and for any diameter silo.

The highly visible indicator is supplied with the external guide pipe and all necessary fixings to fit it to the silo.

The Genap Level Indicator works using a float and a counterweight combined with a cord and pulleys ensuring that a truly accurate indication of the silo level is reported.

Packed for home and export markets in a cardboard roll the Genap Level Indicator can be self installed in a new or existing silo.
