

Toolbox

Toolbox Basic

People on site often don't have the tools that are necessary to undertake an installation, for example a pallet wagon for unloading the goods or the tools required for building the silo or for easily suspending the silo cover.

Toolbox Premium

To make installation easy, Genap has a "basic" toolbox available which contains the correct tools for installing a normal silo on site or a "premium" toolbox with an extensive range of tools for all situations that our distributors can encounter in the field.
